

SLAM EXPLORATION EXTENDS AIRBORNE SURVEY AT NASH CREEK

FOR RELEASE 9:25AM

MARCH 28, 2006

Miramichi, New Brunswick - SLAM Exploration Ltd. (TSX-V: SXL) (“**SLAM**”) announces completion of an airborne survey over its wholly owned Nash Creek lead-zinc-silver deposit in northern New Brunswick. Geotech Ltd. completed 367 kilometres of helicopter-borne electromagnetic and aeromagnetic survey using its VTEM system flown over a portion of SLAM’s large 892 claim mineral property covering 14,272 hectares at Nash Creek.

Management is highly encouraged by the new data from the VTEM survey and expect to be drill testing the conductive zone at the earliest opportunity. Preliminary results indicate the previously defined conductive system of 1500 hectares extends an additional 2km eastward and 2.5km southward beyond the limits of the previous MegaTEM survey. The VTEM survey also shows a response over the Nash Creek lead-zinc-silver deposit that presently includes an indicated resource of 3.4 million tonnes plus an inferred resource of 1.7 million tonnes. Combined results from the VTEM and MegaTEM surveys have now expanded the conductive area at Nash Creek to include 3500 hectares.

The 43-101 compliant Nash Creek deposit occurs along the western margin of a large horizontal, sheet-like conductive system now measuring over 3500 hectares. Within this broad conductive system, at least three conductive trends are aligned in a north-south direction, parallel to the boundary of the graben that hosts the deposit. The new VTEM data is being utilized in conjunction with MegaTEM and soil geochemical results to identify targets for a diamond drilling program.

SLAM Exploration Ltd. is a mineral resource company based in Miramichi, New Brunswick. The Company is 100% owner of the Nash Creek zinc-lead-silver deposit as well as other base metal projects in New Brunswick. SLAM owns 137 claims and has the right to earn 100% interest in 2066 claims centered in the Bathurst Mining camp. The Company holds varying interests in four gold properties in the gold producing Uchi sub-province of northwest Ontario.

Additional information about SLAM and its projects is available at www.slamresources.com or from SEDAR filings at www.sedar.com. The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.
