

## SLAM EXPLORATION FOCUSES ON GOLD PROJECTS

FOR IMMEDIATE RELEASE

24 JUNE 2009

Miramichi, New Brunswick - SLAM Exploration Ltd. (TSX-V: SXL) ("SLAM"), a gold and base metal resource company, has completed a review of its gold projects in north-western Ontario. The Company seeks to advance these projects through joint venture participation or a strategic partnership. More information on this attractive portfolio of gold projects is available on our website at <http://www.slamresources.com/projects/ontario/>.

The most advanced project is Reserve Creek. SLAM completed a total of 13 holes in 2 drilling campaigns on the Williamson Zone in 2003 and 2008. Of these, 12 holes intersected significant gold mineralization ranging in grade from 1.20 to 15.89 g/t gold over core lengths from 0.4 to 9.5 metres. The Williamson zone has a known strike length of 350 metres and is open along strike and at depth.

SLAM made a new gold discovery grading 6.05 g/t gold over a core length of 1.5 metres on its 70% owned Keezhik property in 2008. This discovery, referred to as the PEN zone is open at depth and along strike. It is associated with a 2,000 metre long humus geochemical anomaly along a porphyry contact.

The Company also confirmed a known gold occurrence by drilling one hole on the KCR zone at Miminiska in 2008. This hole intersected a silicified zone grading 5.97 g/t gold over 2.0 metres. The KCR zone is open at depth and along strike where it is associated with a prominent shear zone.

Results to date indicate a large number of gold occurrences generated by huge hydrothermal systems extending from our westernmost claims at Miminiska to Reserve Creek, a distance of 75 km. SLAM hold interests in 84 claims covering 13,920 hectares comprising a regional play in the Uchi Sub-province of north-western Ontario. This prolific gold producing area is host to the Red Lake gold mining camp where Goldcorp operates one of the world's most profitable gold producers, the Red Lake Mine.

Michael R. Taylor, P.Geo. SLAM's President & CEO, is the Qualified Person, as defined under National Instrument 43-101, responsible for the technical results reported in this news release.

At a recent Board of Directors meeting, Bruce Freeman notified the Board that he did not wish to stand for re-election and tendered his resignation effective 18 June 2009. We thank Mr. Freeman for his many contributions to the Company.

SLAM Exploration Ltd. is a mineral resource company based in Miramichi, New Brunswick. It is engaged in gold exploration in the Uchi sub-province of northwest Ontario as well as base metal exploration in New Brunswick. Additional information about SLAM and its projects is available at [www.slamexploration.com](http://www.slamexploration.com) or from SEDAR filings at [www.sedar.com](http://www.sedar.com). The TSX Venture Exchange has not reviewed and does not accept responsibility for the adequacy or accuracy of this release.

On behalf of the Board
