This profile is focused on recent drilling activities for gold and silver. It summarizes recently reported drilling results including visible gold from all 3 holes drilled on the Williamson gold deposit at Reserve Creek, part of a 10 hole diamond drilling program just completed in Ontario. In addition to visible gold, significant zones of mineralization and quartz veining are represented in the drill core. Assays are pending on 1200 gold samples from the 2,000 metre diamond drilling program. The profile also discusses the successful drilling program and high grade results delivered at Silverjack early this year.

Michael R. Taylor, P.Geo. President and CEO of SLAM, is the Qualified Person responsible for the technical information contained herein.
