

SLAM MOBILIZING FOR GOLD DRILLING PROGRAM

Experienced Team Enroute to Gold Projects

FOR IMMEDIATE RELEASE

21 MAY 2010

Miramichi, New Brunswick - SLAM Exploration Ltd. (TSX-V:SXL) ("SLAM") is mobilizing for its 2,000 metre diamond drilling program in the Fort Hope area of Ontario and expects to start drilling on or about Wednesday, 26 May 2010. SLAM has hired an experienced geologist, Mr. Richard Mann, P.Geol. to supervise the program. He is scheduled to arrive in Fort Hope on Tuesday.

The drilling program will test three gold projects located in the Fort Hope area east of the historic Pickle Lake gold camp where PC Gold Inc. (TSE:PKL) recently announced successful drilling results (press release 23 March 2010). The Fort Hope and Pickle Crow areas are underlain by Uchi Subprovince rocks similar to the world-famous Red Lake gold mining camp.

The initial hole will test a new gold deposit named the PEN zone discovered on SLAM's 100% owned Keezhik-Miminiska gold project in 2008. A single hole, KL08-18 intersected widespread gold mineralization including 6.05 g/t gold over 1.5 metres and 4.69 g/t gold over 1.0 metres. Soil geochemistry and geological setting suggest a 2,000 m potential strike length along the contact zone of a quartz-feldspar porphyry. The PEN zone is a high priority drilling target open in all directions.

After Keezhik-Miminiska, the drill will move to the Opikeigen Gold Project held in 50/50 joint ownership between Beatrix Ventures Inc. and SLAM. The planned drilling program at Opikeigen will focus on testing the depth extent of Zone OL-12 where previous workers drilled significant intercepts in 1987. Examples of ore-grade results from historical drilling are hole OL87-42 with 3.85 g/t over 14.80 m and including an interval grading 8.68 g/t gold over 6.10 m. In hole OL87-46, two separate intervals were reported with 6.22 g/t gold over 7.00 m and 8.91 g/t gold over 0.80 m. These intervals are drilled core lengths. The true widths are unknown. The results pre-date NI 43-101 regulations and can only be verified by additional drilling.

All of these projects lie within Eabametoong First Nation ("EFN") traditional territories and are subject to a recently signed Exploration Agreement whereby EFN and SLAM will work cooperatively to advance their gold potential.

Michael R. Taylor, P.Geol. President and CEO of SLAM and Director of Beatrix is the Qualified Person responsible for the technical information contained herein.

About SLAM: SLAM is a mineral resource company based in Miramichi, New Brunswick and continues to be active in gold, silver and base metal exploration in Ontario and New Brunswick. Additional information about SLAM and its projects is available at www.slamexploration.com or from SEDAR filings at www.sedar.com.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
